

An Encyclopedia for Children (Chinese Edition)

In the eyes of children, the world is full of many unknown and miraculous things. They are eager to walk out of the perplexity through reading and learning; they desire to solve mysteries through their own analysis and judgment. This book is simple and lively in language, close to children psychology and full of children interests, with the combination of knowledge, thoughts, entertainment and interestingness. It can be a best choice for childrens aesthetic education, moral education as well as the scientific and cultural knowledge education.
