

## Lifeforce Harmonics- A New Vision of Human Consciousness

What is consciousness? A seemingly simple question which led the author on a twenty year quest for answers, through science, metaphysics and spirituality. This journey eventually resulted in contact with a Wandjina, an Aboriginal Australian Sky God, called Zenchi. Under his guidance the metaphysics of consciousness called Lifeforce Harmonics was created. This provided a framework for the rational understanding of the emerging new reality. It was the start of the unfolding of a vision of the future, the Great Transition, where mankind will enter a new Golden Age. This book is the culmination of that process and is split into two sections. The first starts with the Great Transition from the age of deception and control to the new dawning spirituality. The second section presents the original Metaphysics of Consciousness manuscript fully updated and revised for the new millennium.
