

The Shift in Consciousness

Who are we? Where do we come from? What are we doing here? Where are we going? Humans have sought answers to these questions for as long as humanity has existed. Now Camillo Loken and Lilli Bendriss share a comprehensive theory on the nature of all reality. A Shift in Consciousness offers a thorough examination of each of these questions, providing the reader with extensive information and possible conclusions. This book addresses a wide range of research and literature in the scientific, metaphysical and spiritual arenas, covering topics such as energy, frequencies and vibrations, death, the soul, karma, reincarnation, quantum mechanics, consciousness, thought and mind power patterns, near-death experiences, dimensions and density levels, the astral plane, our shifting consciousness, and much more. We live in a time where humanity can take its next step in evolution from Homo Sapiens to Homo Luminous - The Enlightened Beings. As you read, allow The Shift In Consciousness to tap into your imagination and expand your thinking of who you are, why you are here, where you came from, and especially where you are headed as you dive into your own expansion of consciousness.
