

Organically Produced Foods: Joint FAO/WHO Food Standards Programme. Codex Alimentarius Commission (Codex Alimentarius - Joint FAO/WHO Food Standards)

The Codex Alimentarius (Latin for food law or food code) is a collection of internationally adopted food standards. Food labelling is the primary means of communication between the producer and seller of food on the one hand and the purchaser and consumer on the other. The Guidelines for the production, processing, labelling and marketing of organically produced foods are published in this compact format to allow their wide use and understanding by governments, regulatory authorities, food industries and retailers, and consumers.
