

The Disaster Preparedness Guide to Heating and Cooling Your Shelter and Family

How will you prevent your family from getting hypothermia if a disaster strikes during a frigid winter, or from developing heatstroke in a swelteringly hot summer? How will you find the heat to cook your food if there's a power outage? Learn some key tips for cooling yourself, your family, and your home and how to prevent heat-related illnesses. Consider a selection of fuel-burning and wood-burning backup heaters, including masonry heaters, stoves, space heaters, radiators, and more. With Arthur T. Bradley's essential guide, you'll even learn how to prevent your pipes from freezing! A must-have for any reader in case of a disaster.
