

Brainstorming Reinvented: A Corporate Communications Guide to Ideation (Response Books)

Linda Correll offers a radical new way to speed up the creative process through the technique of `creative aerobics. This concept uses four mental exercises that develop elasticity between the left and the right brain - the analytical and creative sides - allowing them access to solutions outside their present problem-solving techniques. Key features of this technique are: it is process driven and participative; it increases productivity of ideas, without anxiety; and it is rooted in what participants do on a regular basis. It will be a useful book for all those who wish to explore creativity within themselves.
