

Survival, A Guide for Thought: E M P Will Change Your Life

Most people never think about future emergencies and how they will affect you and your family. We see other people in the after math of fires, floods, tornadoes, hurricanes, and blizzards almost everyday on TV. Making the news does not mean everything is about to become OK. What will happen tomorrow to your family when all the news crews go to the next disaster? These are all local tragedies. If possible you could move to another location for food, shelter and maybe a job. But the worst is about to come in the form of Total Power Black Outs or an EMP. An EMP is mentioned almost every week on TV or the Internet. This is serious and we all should take notice. Unless you can move to another country, YOU need to be fully prepared for all types of Disasters. My book, Survival, A Guide for Thought will help you understand how bad things can be and what you need to do right now to PREPARE. Get your copy today and begin Planning. You will be taken step by step on how to start your Survival Plan. Do your family members know how to all get together after an emergency happens? Where do you all meet? You will begin by having each person read my Survival Guide. Then start with baby steps by adding the #1 Survival Item to your familys Survival Plan, WATER. How much water needed will be determined by the size of your family and your location. Then you will need Survival Food. Some is as easy as buying select items at your local grocery store. Then you need to add 3-Day Survival Kits. Next you will need Tools and First Aid Kits and the proper clothes for different weather conditions including shoes. You will need bedding like blankets, pillows and comforters. Each age group in your family will need specific needs fulfilled. Medicine is something most people may not consider adding to their Survival Plan. If you need prescription medicine, what will happen

when yours run out? Survival Food is meant for everyone. Does anyone in your family have allergies that need to be of concern? You need to figure out how to cook without electricity for weeks or months at a time. Do you know how? How do you get additional water and purify it? Pets. How will you feed your pets? Friends that need help may come to your home. What will you do to help them? Rioters may find your home. Will you be prepared for them? If you are thinking about these steps listed above, then you are not prepared. You need, Survival, A Guide for Thought so you can put together your familys Survival Plan. Also inside is the #2 item every Survival Plan needs and is generally left out. What is it? I hope you enjoy the videos and the links to useful Survival items.
