

Call for the Nordic languages: Tools and methods for Computer Assisted Language Learning (Copenhagen Studies in Language - Volume 30)

Copenhagen Studies in Language carries studies in both language for general purposes and language for special purposes (LSP). Its scope covers grammar, semantics, pragmatics, text linguistics, and translation, from a theoretical as well as an applied perspective. It is the editors policy to bring out thematic volumes. The present volume on computer assisted language learning is the latest in a series of volumes following this policy. While based at the Copenhagen Business School, the series is open to contributions from linguists in other institutions, in Denmark and abroad.

[\[PDF\] Black Angel: The Life of Arshile Gorky \(Paperback\)](#)
