

Candle Lighting (Shire Library)

This book looks at the types of candles which have been used over the centuries, and describes the various methods of manufacture. The humble rushlight, which utilised kitchen grease, is taken as a starting point from which the developments leading to the modern candle or paraffin wax are traced. With reference to sources such as household inventories from the 16th century, the changing styles of candlesticks are followed. Candle lamps and lanterns are also included and many examples illustrated, along with other appliances which were once essential to candle lighting.
