

Cisco Systems, Inc.: Implementing ERP (German Edition)

Studienarbeit aus dem Jahr 2008 im Fachbereich Informationswissenschaften, Informationsmanagement, Note: 1,3, Hochschule Darmstadt, Sprache: Deutsch, Abstract: Cisco Systems ist der weltgrößte Anbieter von Netzwerk-Lösungen. Mit Produkten wie Router und Switches ermöglicht Cisco den Datenaustausch zwischen Computernetzen und dem Internet. Mehr als die Hälfte der gesamten Basistechnologie des Internets wird nur von Cisco angeboten. Um sein strategisches Netzwerk auszuweiten, übernahm Cisco mehr als 40 Firmen und hält außerdem Beteiligungen an weiteren Unternehmen. Sechs Jahre nach der Gründung wurde Cisco im Jahr 1990 an der Börse notiert. 1997 war Cisco erstmals unter den Fortune 500 Unternehmen und zahlte in den Kategorien return on revenue und return on assets zu den Top 5. Somit ist der amerikanische Netzwerkanbieter ein Paradebeispiel für ein Wachstumsunternehmen. Bis zum Jahr 2000 hat Cisco seinen Gewinn um 288 Prozent gesteigert und ein Kurs-Gewinn-Verhältnis von mehr als 100 erwirtschaftet. Als Informationsquelle für die Erarbeitung dieser Fallstudie dient hauptsächlich der Artikel Cisco Systems, Inc.: Implementierung ERP. Alle weiteren Informationsquellen, die in dieser Fallstudie ihre Anwendung finden, werden mit Fußnoten belegt. Nach der Einleitung wird im Kapitel 2 die Ausgangsbasis für das Projekt ERP vorgestellt. Kapitel 3 spiegelt den Projektablauf wieder. Im Kapitel 4 findet die Bewertung des Projekterfolgs statt. Und schließlich werden im Kapitel 5 mögliche Erfolgsfaktoren für das IM-Projekt vorgestellt.
