

Systems Architecture of a Robot: Its Never Too Early to Teach Kids About the SBC Architecture

Do not doubt. This is a book for parents. Parents should first study this book before they teach kids about the SBC architecture. In this era of knowledge economy, we need a tool to best describe and represent any knowledge system. SBC (abbreviation of structure-behavior coalescence) architecture is such a tool for its capability of integrating the structure and behavior views of a system. The core theme of SBC architecture is: Architecture = Structure + Behavior. A robot has head, hands, and feet as its structure view. A robot also has writing and walking as its behavior view. SBC architecture describes and represents the robot system through integrating the the structure and behavior views of a robot. In such a case, SBC architecture can best describe and represent the knowledge of a robot system. SBC architecture is so powerful in describing and representing any knowledge system. Its never too early to teach kids about the SBC architecture. As parents, we had better keep this suggestion in our mind.
