

ION RATIO INSIDE BODY (Qi) HYPOTHESIS THEORY AND ACTUALITY [HT3]

It had not been certain theories to solve the living body un-science phenomena up to this time, and it has been seemed to a pseudoscience for these regions usually. The Ion ratio inside body detection pendulum operates only through a living body, moreover without adding any physical force from outside. Moreover it changes operation according to state of consciousness. The Ion ratio inside body detection pendulum acts on the peculiar law to the non-periodic Ion ratio current different from a past electro-magnetism. As a result, it had marveled exactly that these un-science fields can be clarified by the new science assumed to the Consciousness cognitive science, the External Qi force gravity transformation theory and the Ion ratio inside body (Qi) science, moreover it is keeping secret the ability to develop into the Qi-electro-weak unification theory. It can be said that the Qi force peculiar to this living body is the Xth force that doesn't belong either of the definitions of past force from the existence of the laws different from the quantum electromagnetism in spite of including the Schrodinger equation in the Integrated wave motional equation peculiar to the Ion ratio current.
