

Dark Matter in Astro- and Particle Physics: Proceedings of the International Conference DARK 2000 Heidelberg, Germany, 10-14 July 2000

Dark matter in the Universe has become one of the most exciting and central fields of astrophysics, particle physics and cosmology. The lectures and talks in this book emphasize the experimental and theoretical status and perspectives of the ongoing search for dark matter, and the future potential of the field into the next millennium, stressing in particular the interplay between astro- and particle physics.
