

Biographical Encyclopedia of Artists (4 Volume Set)

A Comprehensive Reference to Great Artists of the World From Finnish architect Alvar Aalto to Spanish painter Francisco de Zurbaran, the four-volume Biographical Encyclopedia of Artists provides concise profiles of the worlds most important artists. Covering sculptors, architects, painters, video artists, and many other visual artists, this comprehensive reference details the lives and major works of prominent artists throughout history and around the world. Each entry offers basic biographical data on the artist, descriptive characteristics of the artists creative output, significance of the work, career milestones, and locations where the artists work is displayed. Profiles of those artists whose outstanding work is recognized as pivotal in the history of art receive extended, in-depth treatment. Further readings follow selected entries, and a glossary at the end of the fourth volume defines art-related terms.
