

Encyclopedia of The Animals

This book includes more than 300 different kinds of animals. The included 1000 vivid animal pictures with strong visual impact will trigger a genuine feeling between the animals and children, bringing them to a world of wild animals that can be seen at home. Based on children's cognitive habits, there is a humanized design featuring on classified animal entries and an 'information card' specialized in introducing the classification, family and habitat of the animals, which is convenient for children to look for detailed information. There is a special design in this book: a man or a palm is drawn next to each animal so that children can intuitively know the real size of the animal. The book also has a column of related links, which can lead the readers to other pages for further reading the related topics. It enables the children to deeply and systematically summarize the knowledge they have previously learnt so as to satisfy their curiosity and enrich their knowledge.
