

William Bill Bradley: Addingham's Most Inventive Engineer

This book describes the life of William Bradley from his birth in 1885 to his death at the great age of 98. The son of an Ilkley plumber, he courageously travelled to Canada at age 19 and after his return, went on to found his own successful business in Church Street, Addingham. Starting as a vehicle repair and servicing garage but later becoming manufacturer of innovative textile industry equipment. Bill Bradley was a remarkable engineer. During his long working life, as well as helping numerous motorists with their servicing and repairs, he built complicated and uniquely inventive motorcycles in his successful attempts to master cross-country trials riding and he took on a challenge to solve some of the problems that beset the local textile industry. This book tells of his early life, becoming well known in motorcycling circles for his Bradley Special trials bikes (usually named Felix), his life as a family man, and his time as manufacturer of textile equipment at his Beacon Works. The book ends with his final years in retirement and includes appendices giving technical details of his machines.
