

Morphophonemics of Modern Hebrew (Routledge Revivals)

Routledge Revivals presents a reissue of Noam Chomsky's MA thesis, written in 1951, and first published in 1979. *Morphophonemics of Modern Hebrew* is a landmark study in linguistics and generative phonology, which provides not only an analysis of morphophonemics but of the entire grammar of Modern Hebrew from syntax to phonology. Professor Chomsky's goal in this thesis is nothing less than a complete generative grammar of the Hebrew language. This work is of singular importance as it contains the genesis of the author's work in the field of generative grammar which has had such a profound impact upon the study of linguistics. This reissue of a truly pioneering work will be of great interest to all those concerned with generative grammar and its origins, and with the progression of thought of one of the greatest minds of our time.
