

## Get Started Fly-Fishing!

Get Started Fly-Fishing! is the perfect guide for anyone wishing to learn the fundamentals of fly fishing and start catching trout with a fly. The author is a fly fishing guide, instructor and angler with over thirty years fly fishing experience, and has introduced hundreds of anglers to the sport of fly fishing using the very same principles contained in this book. The starting point for this book is specific: fly fishing for trout in rivers. This is how most anglers begin their journey; they start by exploring their local waters armed with nothing more than a five-weight fly rod, floating fly line and Adams dry fly to seduce elusive trout from their watery domains. In addition to teaching the basics, this book will also give recommendations for developing more nuanced approaches that may be required for specific rivers and conditions.
