

Factory and industrial management Volume 16

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1899 Excerpt: ...are ably presented by Captain Mahan. They are the maintenance of peace, the extension of just and stable government, and freedom of commerce. The work which England has done in Egypt, India, and Africa has been of inestimable benefit to the world. Germany and the United States are aroused to the same sense, and all must stand together for the policy of beneficence and progress. The leaders of finance and industry realize it, and no ruler or government dares to ignore their voice in a craving for political power or military glory. But capital works through industry. The first and the greatest reward, the closest and largest interest, are those of the engineer. By Arthur Warren. ALL war correspondents are not immune. Their susceptibility to the fever of excitement may be a qualification. One of the feverish accounts of the sinking of Cerveras fleet began: As the smoke from the Spanish vessels rose from behind the hills at the narrow entrance of Santiago harbor, a hurried signal from the Brooklyn was followed by a rush of the American crews to the winches, and then all the Yankee ships weighed anchor and started full-speed after the enemy. The account was possibly graphic, but it was not true. The crews did not rush to the winches, because they were not ordered to do so; there would have been no object. The ships did not weigh anchor, because in weeks they had not dropped an anchor. They did not start at full speed, because they were not in condition. On a modern warship all the facts of a fight are not to be seen from the bridge. There are important facts which lurk in what the word-mongers call the bowels of the ship. Some news seekers appear inclined to think that on the bridge

and in the cabin of the commander they will find the fo...
