

Raoul Teachers K-Pop Korean language in English -7: The National Anthem of Korea English Version Included

The lessons from Raoul Teacher (Park, Won-gil from Busan, Korea) are a great opportunity for us foreigners. I think of these lessons, I have begun to understand, what does the Korean culture Korean people. Korea love for her outstanding people, for its history, its culture, its beauty. People, culture, economic life and everyday life, the beauty of the tradition and history all of which can be found in the lessons of Raouls Teacher. Because the language of a people is in fact the very life of a people. I believe that Raoul Teacher has experienced particularly original method, through the introduction of the study of Korean language classes, with the help of k-pop music. Korea has a special language.excellence, is writing logic, who she has learnt the alphabet correctly has made a big step in the study of the Korean language. The resumption of classes is also an opportunity for students. Forward, every time, to the extent that time allows me, to discover the lessons of this generous and good teacher educator. Raoul Teacher has become for us, his students, regardless of our linguistic affiliation, age and education, a symbol of a generous act of learning. Thank you Teacher Raoul! by Maria Cristina, A writer & journalist in Romania
