

Colour Astrology - Life Path Colours and Numbers 2012

Colour Astrology uses the symbolic language of colour, numerology and colour cosmology to accurately discover the mood and essence of each year in a nine year moon cycle. Every year has a colour and number and each of us has a personal Life Path colour and number depending where we are in the cycle. Your colour and number reveals information about your life situation and offers inspiration and guidance enabling you to solve problems, see new opportunities and improve your relationships, so that you can create a positive future. With 25 years experience of working with colour and sacred numbers, best-selling author, Suzy Chiazzari shares her knowledge and insights to predict future trends in the environment, society, money and finance, fashion and decor for 2012. The book also carries a profound message because Suzy discusses the mysteries and myths surrounding the year 2012 and how these relate to the Mayan calendar, the speculation about the end of the world and the start of a New Age of spiritual enlightenment.
