

Love at Work

At last, we can say the word love at work. We can acknowledge what has been true all along: love is what works at work. Love has been just outside the office door for centuries. We have heard its knock, but we have said, not here. Some enlightened leaders have recently moved to, not yet. But finally, Nigel Cutts has said, now. In this beautiful book he has opened the door. He has done this because love is what produces results. People perform best when they are loved: when they are respected, when they can soar because of who they are their experience, their talents, their capacity, their intelligence is cherished. We all know this. Now we can stop believing the nonsense. We can stop putting off putting love on the top of the list of required expertise in leaders.
