

## Prepping Made Easy: The First Steps For Successful Prepping

Do you want to get started prepping, but don't know where to start? Do you want to get started prepping, but think it is too expensive and you're already living paycheck to paycheck? This guide is exactly what you want because it is Prepping Made Easy. I understand living paycheck to paycheck and how tough it is to plan for emergencies that may take place in the future when you can hardly afford to buy the groceries you have now. I understand that you can not afford to stockpile food and supplies for an emergency situation. This guide is exactly what you need because the reality is you can't afford not to be ready for any emergency. Not only does your family depend on you putting food on the table everyday of the week, your family also depends on you keep them safe and to see them through an emergency when it may happen. Today more than ever we need to be ready for emergencies. Everyone should always have enough supplies ready at any given time for an emergency. This guide will walk you through what needs to be done to get started. I have been a prepper for several years now and I can provide you with first hand knowledge of the things that you need to do and things you will need to avoid when starting out. If an earthquake, hurricane, winter storm, or other disaster strikes your community, you might not have access to food, water, and electricity for days or even weeks. By taking some time now to store emergency food and water supplies, you can provide for your entire family. Even though it is unlikely that an emergency would cut off your food supply for two weeks, consider maintaining a supply that will last that long. This quote was taken directly from the Government website. There are a thousand books or guides out there about prepping. My guide will walk you through the easiest, most cost effective (cheapest) and simple to understand way to start

prepping. When I wrote this guide I had a few things I wanted to accomplish. I wanted to share with everyone that you don't need to stockpile years worth of food and supplies to start prepping. I wanted to show how easy it is to start. I wanted to show that everyone can do this with very little cost involved. I wanted to let everyone know that they need to be prepared for emergencies. You don't have to spend thousands of dollars to be ready and The Poor Guys Prepping Made Easy Guide will help you slowly build an Emergency Stash of food, water and medical supplies that will last you and your family 3 days to 2 weeks. I will also cover storage supplies for longer time periods but my main concern is just getting you started. Are you ready? This guide is priced low because I do not care about making money from this. I care about helping others to be ready and I want every person in America to be ready for anything that may happen. For less than the price of a hamburger, you can get this guide and use the information to begin prepping. This guide is exactly what you want because it is Prepping Made Easy.
