All of us have been in a situation where we felt that we would have been better off if we had managed our time efficiently. Procrastination and laziness have been the main cause of ruin for a majority of people. On this note, there is no shortage of people who view time as an enemy. Any efforts that we take in the last few minutes that are overseen by a ticking clock will only reduce our productivity. It will make us much more incapable of results than we are used to. Not being able to deliver on time makes us lose credibility both in our professional and personal circles. A very unique method was drawn out to combat this method, called the Pomodoro technique. This technique was designed as early as 1992. All of us want to be able to utilize the time we have on hand in the most efficient way possible. Without effective time management, we cannot hope to be able to create new ideas or have a stress free environment. Most of our colleagues and peers experience stress at elevated levels because they are inept at managing the time that they have on hand. Increased stress due to such small reasons is not something to be laughed at. They can have adverse effects on our physical and mental health. The Pomodoro technique enables the same set of people to turn their lives on their heads. This technique will make you stop, observe and reflect on all the things that you could be doing in a better or faster way to the same level of quality. This book hopes to enlighten the reader on the intricacies of the Pomodoro technique. Here is Preview Of What You'll Learn..
