

Chinese Sounds and Syllables A Handbook for Indians

The objective of the handbook is to educate people in India how to correctly read and write the Chinese sounds and syllables. Cross-cultural communication and interactions between the people of India and China have greatly increased in recent years. Yet errors in transliteration and misrepresentations of various types have been noticed in newspaper reports as well as in academic and business circles. Therefore, a proper guideline is being offered so as to assist the Indian readers in pronouncing the Chinese syllables correctly. The handbook contains Chinese sounds and syllables in seven different languages of India. Readers capable of reading seven different scripts of India can acquaint themselves with not only the Chinese sounds but also with daily expressions in Chinese, tourist attractions in China, the correct method of spelling and writing Chinese names, and most importantly to gain historical and geographical knowledge about China. Learners of Chinese as well as professionals in every sphere can benefit out of this handbook.
