

Real Slow Food on a Budget

Slow cooking is a frame of mind, not a list of recipes that take a long time to prepare. There are recipes in this book that (with practice) can be prepared in 20 minutes, whilst others can happily sit in an oven for several hours (and will improve for it). The pre-requisites are planning, careful selection of the ingredients and cooking those ingredients in the best way possible. Stewing fish for a long time will seldom make for a good meal, whereas marinating tofu overnight can make the difference between a snack and a dinner to remember.
