

# Recent Developments in Gravitational Physics: Proceedings of the 15th SIGRAV Conference on General Relativity and Gravitational Physics (Institute of Physics Conference Series)

This volume provides an overview of progress in gravitational physics. Recent theoretical, experimental and observational results are reported in this exciting field. The book is based on the plenary, invited and contributed papers presented at the biennial conference of the Italian Society of General Relativity and Gravitation (SIGRAV) held in Rome, 9 - 12 September 2002. Topics covered include general relativity, quantum gravity, relativistic astrophysics, cosmology and experimental gravitation.
