

Savvy Investing for Women

In this woman-to-woman guide to wealth-building, experienced investment specialist Marlene Jupiter explains the basics of investing to empower all women to secure their own financial success. Statistics show that while women today control roughly 52 percent of Americas wealth, they are often vulnerable when it comes to making important investment decisions. Jupiter aims to help women overcome any feelings of helplessness about investments, enabling them to take charge of their financial futures. Throughout the book, she gives women all the information they need to know for successful money management, research, planning, and personal risk tolerance. The material is presented through personal, real-life, and historical anecdotes, and her points are illustrated with easy-to-follow examples, interviews, and advice from seasoned (women) professionals.
