

# Shared Purpose: A thousand business ecosystems, a world wide connected community, and the future

This is an insiders book about what pundits call the ARM ecosystem and members call an open ecosystem. Members include name brands like Apple and Samsung and thousands you may not know. They power your smartphone, your smart thermostat, fitness band, and smart car. Most important, more than any other group they shape the future of the \$2.2 trillion connected world. This book is the first to describe the inner working of the worlds most successful technology ecosystem--actually an ecosystem of thousands of ecosystems, an economic fractal, and one that already touches most people on earth.
