

Survival Seven: The 7 Skills You Must Start Learning Now To Survive The Coming Collapse

Survival Seven reveals the 7 most important survival skills you need to start learning today if you want to survive the coming collapse. These are not outdoor survival skills, but rather skills that everyone living in a free society needs to learn in order to protect themselves if that society should crumble. Skill #1

Helicopter Ben Bernanke has just implemented QE2 - keeping his promise to flood the US with more unbacked fiat cash. As inflation causes dollar prices to EXPLODE - you may quickly find yourself unable to purchase even the most basic necessities - UNLESS you know this skill and start practicing it now. Skill #2

Breadlines, common in Soviet-era communist countries, may soon make a return. This time though, it could happen in the USA. As wheat, corn and soy prices continue to skyrocket, and big agriculture continues expanding their GMO monopoly over the worlds food supplies, only this skill will ensure you and your family dont risk starving to death in the coming months and years. Skill #3 Ever seen a picture of the earth at night? While bright lights still mark the cities and towns of the developed world, the Peoples State of North Korea is completely dark - a single black eye on the planet. Unfortunately, with towns and cities struggling to meet power demands, and the environmentalists passing one socialist bill after another, the energy sectors of the USA and other western nations are getting ever closer to that same darkness. The threat of a solar flare event, or even hackers shutting down the grid only further increases the risk. With this skill though, you will not be at their mercy. Skill #4

Even as the global pharmaceutical companies try to force their drugs on everyone, the number of people who can actually afford health care continues to plummet. As if this wasnt bad enough - in the case of a natural disaster or national emergency - medical services will

be quickly over-run and many of the sick and injured will be left fending for themselves. If you learn this skill though, you can help make certain that you and your family will not be held hostage by those who profit from sickness, disease and injury - no matter how bad things get.

Skill #5 Whatever form the coming collapse takes, there is absolutely no doubt that spontaneous outbreaks of mass public violence will occur - as we have already seen during recent events in Greece and the United Kingdom. With this in mind, you and every person in your family - including young children and teens - should start mastering this skill to protect yourselves from physical harm by those who decide to turn violent.

Skill #6 In any disaster situation - access to many of the creature comforts we now take for granted will become extremely limited. Because of this, the men or women who have this skill will be some of the most highly-regarded. Furthermore, you will ALWAYS be able to trade this skill for other things you need to survive. In fact, if you learn to do this, you will become known as such a valuable asset that others in your community will do their best to make sure no harm comes to you.

Skill #7 This skill is the one almost NONE of the so-called survival experts ever mention. Yet, it only takes a bit of practice to start learning and taking advantage of its benefits. With this skill you will immediately increase your sphere of safety, influence and control during any crisis. Best of all, acquiring this skill is a enjoyable activity everyone in your family can participate in. For those who realize that economic collapse, war and natural disasters are a reality they are likely to face in their lifetime - this book outlines the emergency preparedness skills you'll need to survive - and even thrive - in hard times.
