Or maybe that you went camping far into the wilderness but realize that you forgot to bring matches and the lighter that you brought turned out to have no gas in it... One of the most essential tools that mankind has ever discovered has been the discovery of fire. Fire is there to keep us warm. To cook our food. To bring light in the darkness. It does so many other useful things that we need and take for granted on a daily basis that we were completely unaware of... until we no longer have those modern conveniences and find ourselves cold, hungry, and in the dark...
