

Tables of the $SU(mn) \supset SU(m) \times SU(n)$ Coefficients of Fractional Parentage

The f_2 -particle coefficients of fractional parentage for the group chain $SU(mn) \supset SU(m) \times SU(n)$ or $U(mn) \supset U(m) \times U(n)$, with arbitrary m and n and with as many as possible symmetries, are tabulated for systems with up to six particles and for f_2 equal up to three. All the coefficients are in the form of square roots of simple fractions. The algorithm for the CFP as well as the symmetries of the CFP are discussed.

Tables of the $SU(mn) \supset SU(m) \times SU(n)$ Coefficients of Fractional Parentage by Jin-Quan Chen, Xiong-Biao Wu, Mei-Juan Gao. This book provides extensive tables and indications of computational methods for the Clebsch-Gordan coefficients and isoscalar factors of the graded $SU(mn) \supset SU(m) \times SU(n)$ group chain. The f_2 -particle coefficients of fractional parentage for the group chain $SU(mn) \supset SU(m) \times SU(n)$ are tabulated for systems with up to six particles and for f_2 equal up to three. All the coefficients are in the form of square roots of simple fractions. The algorithm for the CFP as well as the symmetries of the CFP are discussed. The book also includes tables for the Clebsch-Gordan coefficients and isoscalar factors of the graded $SU(mn) \supset SU(m) \times SU(n)$ group chain. The f_2 -particle coefficients of fractional parentage for the group chain $SU(mn) \supset SU(m) \times SU(n)$ are tabulated for systems with up to six particles and for f_2 equal up to three. All the coefficients are in the form of square roots of simple fractions. The algorithm for the CFP as well as the symmetries of the CFP are discussed.

group chain $SU(mn) \times SU(m) \times SU(n)$ or $U(mn) \times U(m) \times U(n)$, with arbitrary m and n and with as many as **Chen, J. Q. (Jin-Quan) [WorldCat Identities]** Hence this 80% hidden colour part (see table 1) would prevent the coefficients of fractional parentage for the group $SU(12) \times SU(4) \times SU(3)$ [4,5]. $S_x(f_1), S_q(f)$ and the irreps of $SU(m)$, $SU(n)$ and $SU(mn)$ (of the group chain. $SU(mn) \times S(f) \times S(f_1) \times S(f_2)$ in the x , y and $q(x, y)$ spaces be respectively denoted by. $?, ?$. **hidden colour hypothesis - Indian Academy of Sciences** [1] Tables of one-body CFP for the group chains $U(mn) \times D U\{m\} \times U(n)$ and [1] Tables of the $SU(mn) \times SU(m) \times SU(n)$ Coefficients of Fractional Parentage, **PDF (965 KB) - World Scientific** We study the pionic decay of a possible dibaryon $d \rightarrow N + N + \pi$ in the quantum numbers $JP=0^-, T=0$ and a mass $M \approx 2100$ MeV within the MIT bag. $SU(24) \times SU(2) \times SU(12) \times SU(2) \times SU(6) \times SU(2) \times S$?
