

The Forgetting Curve (Memento Nora)

Aiden Nomura likes to open doors especially using his skills as a hacker to see whats hidden inside. He just keeps pulling until one cracks open, exposing the flaws. Its like a game until it isnt. When a Therapeutic Forgetting Clinic opens in Bern, Switzerland, near Aidens boarding school, he knows things are changing. Shortly after, bombs go off within quiet, safe Bern. Then Aiden learns that his cousin Winter has had a mental breakdown. He returns to the US immediately. But back home in Hamilton, Winters mental state isnt the only thing thats different. The city is becoming even stricter, and an underground movement is growing. Aiden slowly cracks open doors in this new world. But behind those doors are things Aiden doesnt want to see, things about his society, his city, even his own family. Aiden may be the only one who can fix things before someone else gets hurt.
