

The Wisdom Well: Dip Into Your Subconscious to Foretell the Future [Cards]

The author of this unusual book-and-card set shows readers how to combine a simplified method based on tarot reading with general principles of Jungian psychology. The resulting benefits include understanding oneself and gaining insights to the future. Thirty-six specially designed cards--half the number of a standard tarot deck--allow users to conduct simplified readings. Thus they avoid the complexities and confusion they might encounter with a full tarot deck. Each of the 36 cards specifies a personality designation according to Jungian psychology. Among them are: Psyche, or our true selves . . . The Persona, or the masks we adopt in life . . . The Wise Old Man, or the well of ancestral knowledge and good counseling . . . The Child Within, signifying innocence, naivety, and immature aspects of self . . . Mother Moon Goddess, or the mother archetype . . . The Beggar, signifying psychological denial of unwelcome character traits. These are just a few of the 36 personality types reflected in the cards. The author instructs on correct methods of card reading for greater self awareness. She advises her readers to dip into the Wisdom Well and learn what the present means and what the future can bring. More than 150 color illustrations.
