

The Transparency of Others

The affairs of men are of very little interest to those who have already crossed over the threshold of evolution and met their logical result. The Transparency of Others is about what it is like to be an ascended master or ascended individual once you reach the threshold of your evolutionary thrust. It is written in plain language for just about everyone to understand. There is nothing esoteric about this book. It is written as matter-of-factly as possible to ensure that everyone has a fair chance of understanding it. It is for both the layman and the aspirant. Both benefit from reading this book. This book contains some long sought out and little known facts about ascended masters and is a rare discovery on the shelf. In addition to these facts, ascended masters are discussed in great detail in how they interact with society and mainstream civilization. It is no wonder that the author of this book is John Henry Morel. It seems that under the guise of the poet-essayist-new-age-author, there is a practicalist as well. He cites many references to his experiences with ascended masters and as well discusses what he knows about them in practical language and words. Do not be surprised if you understand everything in this book, which is a rare experience for those of you who are avid readers of this authors works. Be prepared for what you dont know and to learn more about what you think you know about ascended masters. Rodaian Press, Laguna Beach, California.
