

WCDMA Radio System Theory and Equipment Maintenance of (Huawei Version) (National Model For Vocational Students Construction Projects Series of schools ... (For Vocational Students) (Chinese Edition)

This book is written in accordance with the Ministry of Education, proposals on strengthening the Personnel Training (Education [2002] 2), as well as on a number of suggestions to improve the teaching quality of higher vocational education (Education [2006] 16), combined with practical experiences of many years of teaching reform. This book takes the WCDMA radio network base station equipment and base station controller equipment of Huawei Technologies Co., Ltd. as the main line, introduced six parts: namely, the principle of WCDMA wireless systems and related equipment, including the 3rd generation mobile communication system (3G), the basic principles of WCDMA wireless systems, Node B base station equipment and maintenance, RNC base station controller equipment and maintenance, B3G/4G mobile communication systems, WCDMA wireless network equipment configuration and maintenance. The contents in this book is selected very appropriate, the system is novel, with clear layers, practical, well targeted, and with equipment diagrams and case studies, highlighting the application and engineering practice. The book can be used as applied undergraduate communications and Vocational communications majors, and other related professional materials, and also available engineering and technical personnel who are engaged in the communications technology services as a reference book.
