

EMP Survival: 26 Steps on How to Increase Your Safety in Case of EMP and Solar Flares (EMP survival, EMP survival books, EMP survival plan)

Imagine a world where all your electronic devices become completely unresponsive. Your car has no ability to start, your computer is completely fried, and everything becomes dead quiet. This is a very real possibility that can happen, and if you're not prepared than you're only asking for the worst to happen. An EMP blast, or electromagnetic pulse, is one of the absolute worst disasters that can happen to civilization today. Not only are we in constant threat from religious extremists, who have the ability to build these weapons with no problem, but we also have a giant fusion reactor constantly throwing highly ionized atoms our way. These are called CMEs, or coronal mass ejections, which our sun is due up for very soon. When this situation happens you can expect no more technology, power, or internet. Pretty much the foundation of humanity right now. Don't allow yourself to be caught off guard, which can mean almost certain death. Things aren't always going to go your way, but with these tips you can definitely increase your odds of survival exponentially.
